F M
P ARCHITECTS

ECCO Shoes commissioned FMP to design the renovation and fit out of their flagship Cork store in 2008. The existing building was in poor condition although many existing features such as the stone surround to the first floor window were in very good condition.

The brief called for retail space on the ground and first floors with staff rooms and storage on upper floors. Technical prerequisites in fire safety and universal access were successfully incorporated into the design.

The use of high quality materials in the restoration and fit out of the building allowed the client to furnish the retail unit to a top standard and marked the store as one of the finest on Corks main shopping thoroughfare, St. Patricks Street.

Completed 2008
