

FMP Architects have worked with Red Hat for a number of fitout projects on their premises at Cork Airport Business Park & Waterford. Red Hat are the world's leading provider of enterprise open-source solutions, including high-performing Linux, Cloud, container and Kubernetes technologies. Their headquarters are in Raleigh, North Carolina.

Red Hat took possession of the Cork Airport Business Park unit in 2009 and the initial fitout involved the relocation of their offices from a smaller nearby unit to space on the first floor. The company expanded and after taking possession of the remainder of the building, FMP managed the fitout of the first phase of the ground floor in 2015.

Red Hat Software, Cork & Waterford

In 2017, FMP completed the fit out for Red Hat's premises in Waterford.

This project again involved fitting out an existing building with open plan office space, meeting rooms, break out spaces and staff facilities, all while continuing to reflect Red Hat's branding.

Most recently in 2019 FMP managed a short term fitout of the remaining ground floor unit in Cork Airport Business Park in advance of a final remodel of the ground and first floor and a complete upgrade of the services system. The remodel takes into account Covid 19 distancing requirements. On completion of the current works Red will occupy 100% of the unit (2,450M2).
